EDUCATION

Ohio State University, Columbus, OH Expected Graduation: May 2028
Bachelor of Science in Computer Science & Engineering, Specialization in AI/ML GPA: 3.901
Selected Coursework: Software Components, Software Development & Design, Discrete Structures, Data Structures & Algorithms, Low-Level Programming & Computer Organization, Real Analysis (Honors), Linear Algebra (Honors)
Honors: Dean's List (2024-2025), Maximus Scholarship, STEM Exploration & Engagement Scholars (2024-Present)

TECHNICAL SKILLS

Languages: Java, C/C++, Python, Ruby, HTML/CSS, JavaScript, SQL, Octave/MATLAB, Bash, x86 Assembly
Frameworks: Node.js, React, Next.js, Rails, JUnit
Developer Tools: Git, GitHub, Subversion, Visual Studio Code, Eclipse, Android Studio, GDB, OnShape
Libraries: NumPy, Matplotlib, PyTorch

EXPERIENCE

Undergraduate Teaching Assistant January 2025 – Present
Ohio State University Columbus, OH

- Directly assisted and mentored 40+ students weekly in core Computer Science principles across foundational courses (Software 1, Software 2).
- Provided specialized instruction and mentorship in Java programming, focusing on implementing efficient and maintainable data structures and leveraging Git for collaborative version control.
- Conducted large-scale code review for over 15 homework assignments and 5 major programming projects per semester, providing targeted feedback on code quality, algorithmic efficiency, and best practices.

Summer Technology Assistant May 2022 – August 2025
Solon Board of Education Solon, OH

- Maintained the central IT asset inventory database (utilizing an internal tracking system) by tracking asset lifecycle status and accurately logging the deployment, removal, and misplacement of units.

PROJECTS

Automated Academic Scheduler | Ruby, SQLite3, REST APIs (Canvas, OpenAI, Google) February 2026

- Collaborated in a team of 5 to develop a full-stack automation tool to synchronize Canvas LMS assignments with Google Calendar using RESTful API integrations.
- Engineered a persistent caching layer with SQLite3 to minimize redundant LLM API calls, reducing latency and operational costs.
- Engineered an automated time estimation pipeline using the OpenAI API, leveraging structured JSON schemas to parse task complexity for a custom workload-balancing algorithm.

Health Insurance Recommender | Amazon Athena & Bedrock, SQL, React, Git October 2025

- Engineered a Retrieval-Augmented Generation (RAG) pipeline using AWS ETL workflows, SQL, and LLM integration to deliver personalized health-insurance questions to users.
- Designed an interactive user interface using React, enabling the display of dynamically generated personalized health-insurance questions and tailored recommendations from the RAG pipeline.

ACHIEVEMENTS

National Merit Scholarship Winner March 2024
Eagle Scout | Troop 504 December 2023

- Earned Eagle Scout Rank after years of leadership service in Troop 504 including role as **Senior Patrol Leader**.
- Eagle Scout Service Project: Organized volunteers to build a **60-foot turnpike** in Cuyahoga Valley National Park.

National Honor Society April 2023
